EXPERIENCES

2022-2023 **QUECHEN Silica (THAILAND) COMPANY**

Position: QC Lab Technician

- lab technician sampling and testing the product quality and Titrate to determine the concentration of the chemical sample of the raw material. There are 3 testing processes.
- synthesis processes check the temperature, check brume Silicate concentration titration and total solids content of the silicate was checked and Centrifuge the liquid silicate sample to see the precipitation, check temperature and brume dilute titration sulfuric acid, check temperature and brume mother liquid, check pH SP Tank
- Pressure filtration process Weigh the wet silica, check pH, check conductivity. and check viscosity The sample was heat-treated to see the weight loss on dryness.
- drying process Weight the dry silica check pH, check electrical conductivity, check particle size of silica powder, heat the sample, check BET with Nitrogen, check CTAB with titration find surface tension.
- check turbidity of wastewater treatment check pH and conductivity will be tested before recycling. inform supervisor if results do not meet specifications.

2021-2022

Thai Film Industry Pub. Co., Ltd.

Position: QA Inspector

- Check the haze of the plastic film
- Check the film surface before sending to the customer
- Check the flexibility of both TD and MD
- Check sample discharge
- Check for self-shrinkage when exposed to heat
- Check that the thickness and weight are straight according to spec warranty
- Check the plastic film gloss type Find opacity is the opacity or the transparency of the perlize film that can be an ice cream sachet QC in line
- check the production process Inspect product packaging according to standards. Issue COA document

ABOUT ME

I am Piyachat Kenphon, Quality Assurance Specialist 1 year experience. I am an expert in managing and managing day-to-day teamwork with a lot of experience, always ready to learn new tasks. I intend to work in the organization. And I will develop economically from the assigned duties. and I will apply my skills and experience to the job. I will continue to comply with corporate policies to carry out my responsibilities.

SKILLS

- strong problem-solving skills
- knowledge of programming languages
- good attention to detail
- time management skills
- redly to learn new work experience

EDUCATION

2021 Rayong Technical College

{High Vocational Certificate}

Rubber and Polymers Technology Program

2017 Romklao School

{senior High School}

Science and Mathematics Program

HOBBIE

- Watching Movie
- Listening to Music
- Travel
